

We travel often through the Baltimore/DC area. Thanks to XM radio, we now have up to date traffic information. We use to listen to WTOP but their reports are only about 30 secs to 1 min long and you have to wait until the 8's. Plus the signal isn't strong enough for us to get it early enough to know what direction to go on the beltway.

Having a channel that's devoted to the area is fantastic! We get information immediately and can make our plans accordingly.

Please let XM continue with their traffic and weather updates!
